“ However high tech our equipment or smart our processes,  
it's our people that really make the difference. ”

**Cameron Murray**  
Managing Director, PFS Engineering

# *PFS engineering solutions.*

Trusted engineering solutions: delivering quality, innovation, and client success since 1992.

At PFS Engineering, our commitment to building strong client partnerships lies at the heart of everything we do. Backed by decades of expertise, our experienced team and proven engineering methodology enable us to deliver complex projects quickly, safely, and with exceptional quality. Since 1992, we've expanded our skilled team and cutting-edge facilities, becoming the one-stop shop for end-to-end engineering services that turn vision into reality.

Our clients trust us to consistently provide high-quality, on-time, and

on-budget engineering solutions which we make possible through intelligent design and innovative thinking. Our dedication to finding solutions sets us apart, and we are driven by a team passionate about their craft and your success.

The PFS leadership team has many years of engineering experience, making us the trusted partner for businesses and agencies seeking outstanding engineering and fabrication services.

Meet some of our key people.

# Safe and sound.

The PFS Total Commitment. Our people, our work, our word.

## Health and safety

At PFS, safety is our top priority. With extensive experience and a proactive safety culture, we ensure that every project meets the highest health and safety standards. Through strict protocols, continuous training, and hazard management, we strive for safe working environments, ensuring everyone goes home safe, every day.

## Environmental commitment

At PFS, we actively work to minimise environmental impact by reducing waste and optimising resources through innovative design and processes. Our compliance with environmental standards, such as ISO 14001, ensures that we contribute to a sustainable future while delivering high-quality engineering solutions.

## Quality assurance

Through a proven methodology and ISO 9001 certified practices, we ensure each project meets the highest standards of performance, safety, and efficiency.

As holders of the Steel Fabricator Certification (SFC), we are independently verified to manufacture steelwork according to international best practice.

Our attention to detail and dedication to continuous improvement guarantee reliable and consistent outcomes for our clients.

Please view our website for our full health and safety, environmental and quality-related policies and procedures.

# Contract Manufacturing

*Leverage the skill and scale of our integrated team for manufacturing quality and pace.*

# *Reliable manufacturing solutions.*

Achieve your manufacturing goals with reliable, on-time, and on-budget delivery—whether you need high-volume production to meet the stringent demands of construction projects or a specialised, one-off solution to help you handle high-capacity operations efficiently. Our integrated team, state-of-the-art facilities, and time-proven methodology ensure your designs are fabricated accurately and are of the highest quality.

## *Integrated team*

Our greatest strength is our integrated, multidisciplinary team of highly qualified and experienced tradespeople. Working closely with your designs, we ensure precise, high-quality fabrication at every stage. Each contract is unique, and by assembling a tailored team that aligns with your specific needs, we apply the right expertise to deliver outstanding results. With our in-house capabilities, we can ensure greater control, efficiency, and quality throughout the process.

## *Built-for-purpose facilities*

The PFS Engineering 30,000-square-foot Hamilton facility was purpose-built to enable a one-stop-shop for engineering solutions. Equipped with two 25-tonne gantry cranes (enabling a 50-tonne tandem lift), two 10-tonne gantry cranes, and specialised design, welding, and painting departments, our facility enables PFS to keep our processes in-house.

## *Time-proven methodology*

Our contract manufacturing methodology is built on the understanding that no two contracts are alike. We specialise in working from existing client designs, offering a full suite of fabrication and manufacturing services to ensure efficient, on-time, and within-budget delivery. With a focus on Continuous Improvement, we uphold rigorous safety and quality standards at every stage, ensuring that each product meets your exact specifications and exceeds your expectations.

# *Full-service contract manufacturing.*

If you have a ready-to-manufacture design and are seeking a reliable, full service contract manufacturing solution, look no further than PFS.

With a strong foundation in engineering design and a commitment to innovative, outside-the-box thinking, we can deliver comprehensive manufacturing services.

Our one-stop shop approach, combined with our capacity and flexibility, allows us to deliver high-quality, certified, and fully compliant products on quicker time frames, ensuring efficiency and reliability even on complex contracts.

## *Optional Design Services*

Our design engineering department is at your service. Whether you have fully developed plans or we need to work with you to ensure build-ability, our team can support your requirements. We can optimise the cost of manufacture by utilising our large design engineering department.

## *Fabrication*

PFS excels in light and heavy metal fabrication. We have a wide range of fabrication capabilities, including welding technologies and techniques such as TIG, MIG, and spot welding. By staying close with you throughout this process, we can ensure your engineering projects are completed to specification and built to last.

## *Project Management*

Our team works closely with both clients and subcontractors, ensuring clear communication and seamless project management from start to finish. At PFS, our project execution system is designed to focus on client satisfaction, quality, and safety. These key measures are consistently exceeded across all aspects of our work, reinforcing our commitment to delivering successful outcomes every time.

# *Our methodology.*

Our commitment to using our highly skilled, in-house team ensures that every task is completed with the highest level of care, efficiency, and quality.

Our people are deeply invested in the success of your contract manufacturing project. When you partner with PFS, you get the best of our metal fabrication expertise.

# Design

*Design is the keystone of our capability;  
powered by an entire department that bridges  
the gap between concept and constructible.*

# *Design is our keystone.*

Design is not a standalone service at PFS, but is embedded across all divisions as a catalyst for success. It is pivotal in transforming big ideas into practical, constructible solutions, ensuring that each project is grounded in reality and optimised for performance and aesthetics.

## *Integration into all services*

Our design services are at the core of every project, driving seamless execution from start to finish. By involving our design team early, we work closely with clients to transform big ideas into fully realised outcomes. This tight integration with our engineering, fabrication, installation, and project management teams ensures that every detail is aligned—from the first blueprint to the final bolt—resulting in projects that run smoothly and deliver exceptional outcomes.

## *Multidisciplinary team*

Our design, engineering, and drafting team is a powerhouse of trade-qualified and degree-qualified professionals who blend technical expertise with hands-on experience. Together, working in partnership with our project clients, we push boundaries to deliver innovation. When working with your project, we can bring creativity and problem-solving to every challenge, ensuring exceptional results.

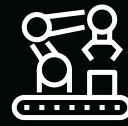

## *Supported by technology*

At PFS, we harness the power of SolidWorks 3D modelling software to transform complex, intricate designs into reality. With deep expertise in handling advanced three-dimensional geometry, we breathe life into even the most challenging concepts. Our use of Finite Element Analysis ensures that every critically loaded component is stress-tested and optimised for efficiency and durability, delivering fit-for-purpose solutions that stand up to the demands of real-world applications.

# *From fabrication to finishing.*

At PFS Engineering, our contract manufacturing services encompass a wide range of metal fabrication capabilities tailored to meet the needs of your contract. Whether you need individual components or complete assemblies, our integrated approach ensures that your designs are fabricated on time and are of the highest standard.

## *High-volume production fabrication*

Light and heavy fabrication capabilities in our purpose-built facility.

## *Repairable spares*

Restoring worn or damaged spares from harsh environments ready for re-use.

## *Sheet metal fabrication*

Sheet metal equipment that is designed and fabricated to meet requirements.

## *Piping*

Steam piping to general carbon and stainless-steel piping.

## *Pressure Vessels*

Safe and efficient handling of pressurised substances including gas.

## *Tanks & Silos*

Effective storage solutions built to your unique requirements.

## *Platforms & Guarding*

Ensure safety, compliance and operational efficiency in an industrial environment.

## *Metal Work*

Precision metal work services, offering custom solutions with exceptional quality.

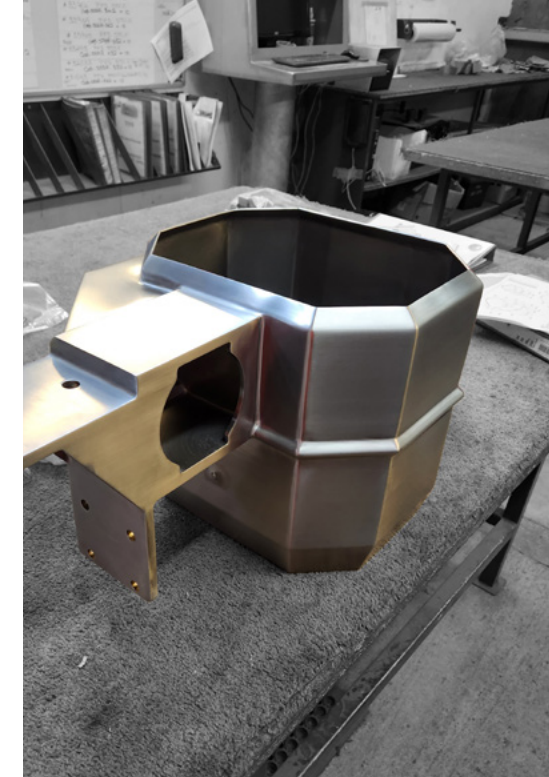

## *Marine*

Expert marine fabrication, delivering durable, custom-built solutions for demanding environments.

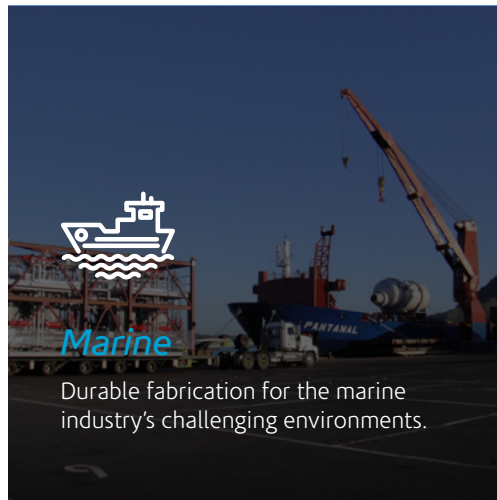

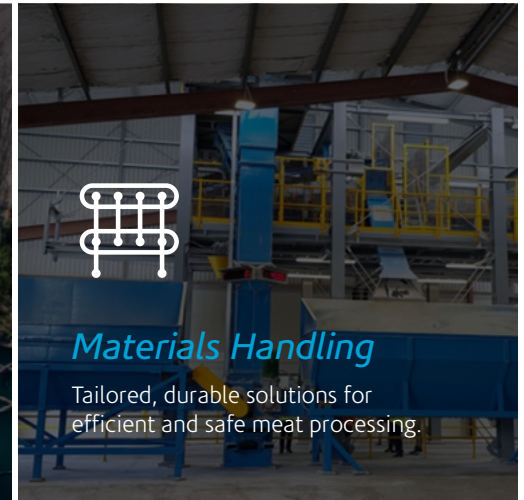

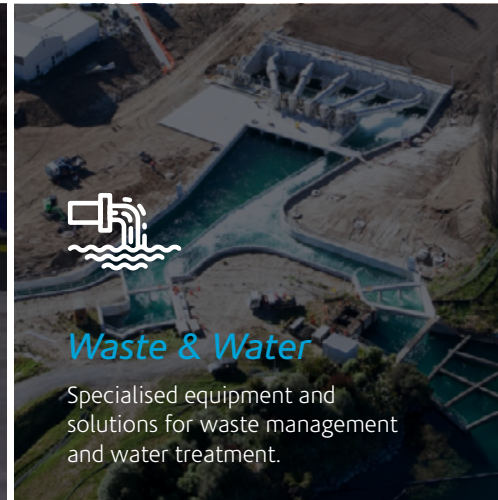

CONTRACT MANUFACTURING EXAMPLES

# Supporting industry.

PFS proudly supports primary industries, delivering essential engineering solutions that help keep vital sectors moving.
